

Protect Your Family's Water

BIG BUBBA™ S101 WHOLE HOME FILTRATION SYSTEM

**Take control of the water quality
in your home.**

The source of your water and its journey to your home can be wrought with contaminants. Help keep your family's entire home water supply safe from lead, **PFOA/PFOS**, **cysts**, and **chlorine taste & odor** with the Big Bubba™ Whole Home Filtration System. Get alerts via text or email when it's time to replace your filter cartridge and enjoy clean, great-tasting water in your home.

Keep Your Water Safe & Healthy

Stay on top of filter changes with the BB-S101 monitor. Easily connect to your home WiFi and get alerts via text or email when it's time to replace your filter.

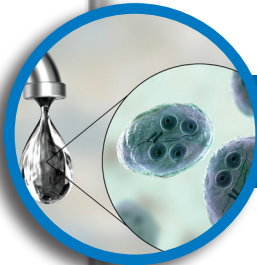

Children under 6 are most at risk from lead poisoning.¹

Lead is a toxic metal that can accumulate in the body over time, leading to major organ damage. Common sources of lead in drinking water are lead pipes, faucets, plumbing fixtures, and certain pipes that carry water to your home.

95% of the U.S. has been exposed to PFAS.²

PFOA and PFOS, the two most common PFAS, are toxic chemicals that simply don't break down. Common in non-stick cookware and food packaging, these "forever toxins" accumulate over time and can lead to major health issues including cancer.

41,000 people are affected by waterborne giardiasis in the US.³

Waterborne cysts like Giardia can carry harmful parasites that impact the digestive system and make people sick. These bacteria come from human and animal waste, and enter the water supply through lakes and rivers.
