

TR2 Small Diameter Riser for Multifamily Projects

Think Watts large diameter TR engineering, but smaller, easier to install, and suited for multi-family homes. The TR2 is used to connect a 2", 2 1/2", or 3" water supply into the building by passing under the foundation and up through the floor without mechanical joints. The UL/FM and NSF approved TR2 replaces numerous fitting, elbows, and spools to reduce the possibility of failures or leaks in comparison to traditional methods and materials.

Higher Integrity

- Single-piece construction removes the mechanical joint beneath the foundation
- Made from corrosion-resistant 300-series stainless steel
- All Watts risers 100% tested against leaks
 - UL, FM, and NSF approved

Easier Installation

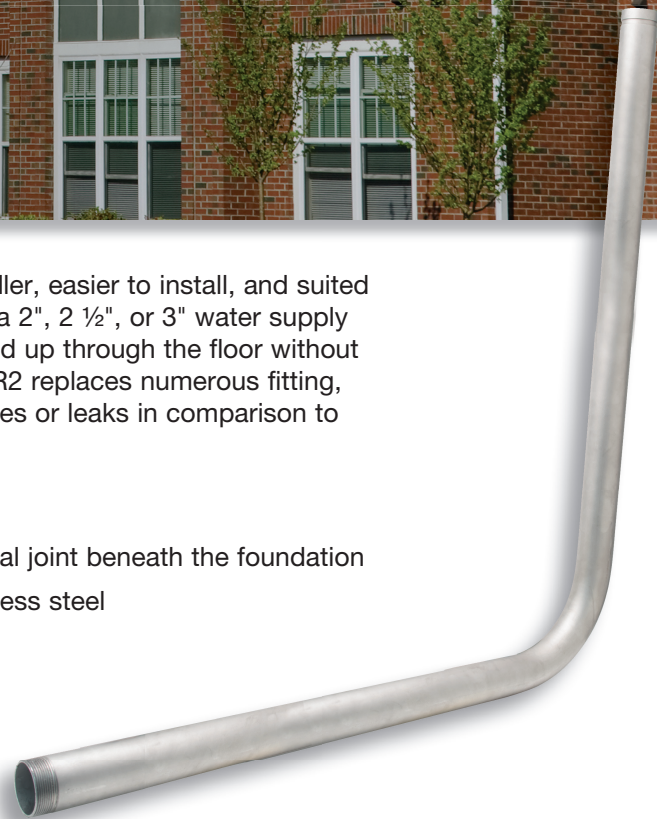

- Eliminates threading, grooving, brazing, and assembling
- Fewer joints to restrain
- Light weight

Fully Customizable

- 3'-16' leg lengths (not exceeding a combined 19')
- Grooved or Male NPT end connections
- MNPT to FNPT and MNPT to Flange adaptors available

Lower Total Cost

- Eliminate labor costs used to construct traditional risers
- Easy and faster installation
- Long and reliable life

Approvals

Fittings FM class 1920
UL HKQA (2"-10")

Risers

Nominal Size	Lengths (Vertical x horizontal)	Connections (Inlet x Outlet)	Ordering Code
