

# Watts Has a Certified Lead Reduction Solution For...

- **High-quality, Safe Water**  
Reduces lead and parasitic cysts
- **Great Tasting Water**  
Reduces chlorine taste and odors as well as particulates, sand, silt and rust particles
- **Single-stage Approach**  
Use a single-stage approach instead of multiple technologies to reduce lead levels in drinking water

Removes up to 99.2% of lead in drinking water

PWDWHCL1 tested and certified by IAPMO R&T Lab and IAPMO R&T to meet NSF/ANSI 42 standards for the reduction of Chlorine, Taste and Odor, and Class 1 Particulates; NSF/ANSI 53 for the reduction of Lead and Cyst; and NSF/ANSI 372 for low lead compliance as verified and substantiated by test data.

High Capacity Single-stage  
Lead Filtration System

# Protect what matters most

Watts single-stage lead filtration system is certified to reduce 99.2% of lead in drinking water

It's well known that aging municipal supply lines and household plumbing are potential sources of lead.

Exposure to lead is especially harmful to young children and can adversely affect both their development and behavior.

Watts has made it easy to ensure your family has safer drinking water. Our single-stage lead filtration system provides protection from lead and other contaminants, and connects directly to most standard kitchen and bathroom faucets.

## High Capacity Single-stage Lead Filtration Under-counter Drinking Water System

With the PWDWHCL1, you can enjoy safer, better tasting water from your existing kitchen or bathroom faucet as soon as it's installed.

- Designed and certified to reduce 99.2 % of lead in drinking water at any point of use in your household, including kitchen and bathroom faucets
- System also certified to reduce cysts, chlorine, taste odor and sediment for great-tasting, safer potable water
- High-flow system (2 gallons per minute) for minimal impact on time required to fill pots and containers
- High capacity 0.5 micron carbon fiber filter (7900 gallons) for less frequent filter changes
- Quarter-turn filter replacement ensures easy installation and maintenance

7900 gallon capacity  
No extra faucet required

System comes complete with fittings & tubing required for a quick and easy standard installation

## Protecting Your Water Made Simple

- ▶ **Healthy**  
Reduces lead, cysts, chlorine, taste, odors and sediment
- ▶ **Convenient**  
Connects to existing kitchen and bathroom faucets, eliminating the need to drill countertop holes for a second faucet
- ▶ **Cost effective**  
Point-of-use option only treats water used for cooking and drinking

**LET IT FLOW**  
*simple and protected.*
