

IBR2 Small Diameter Riser for Multifamily Projects

Think Ames large diameter In-Building Riser (IBR) engineering, but smaller, easier to install, and suited for multifamily homes. The IBR2 is used to connect a 2", 2 1/2", or 3" water supply into the building by passing under the foundation and up through the floor without mechanical joints. The UL Listed, FM Approved, and NSF Certified IBR2 replaces numerous fittings, elbows, and spools to reduce the possibility of failures or leaks in comparison with traditional methods and materials.

Higher Integrity

- Single-piece construction removes the mechanical joint beneath the foundation
- Made from corrosion resistant 300 Series stainless steel
- All Watts and Ames risers 100% tested against leaks
- UL Listed, FM Approved, and NSF Certified

Easier Installation

- Eliminates threading, grooving, brazing, and assembling
- Fewer joints to restrain
- Lightweight

Fully Customizable

- 3'-16' leg lengths (not exceeding a combined 19')
- Grooved or Male NPT end connections
- MNPT to FNPT and MNPT to Flange adapters available

Lower Total Cost

- Eliminate labor costs used to construct traditional risers
- Easy and faster installation
- Long and reliable life

Approvals

Fittings FM Class 1920
UL HKQA (2"-10")
