- Automatic software updates
- Remote management through Watts Home app – iOS & Android compatibility
- English/Français/Español language options
- Error & warning notifications
- Time clock updated from Internet
- 3.5-inch color touchscreen
- Selectable background colors

Sample Mechanical Diagram*

***Concept Drawing:** This is only a concept drawing, not an engineered drawing. It is not intended to describe a complete system, nor any particular system. It is up to the system designer to determine the necessary components for and configuration of the particular system being designed, including additional equipment, isolation relays (for loads greater than the control's specified output ratings), and any safety devices which in the judgement of the designer are appropriate, in order to properly size, configure and design that system and to ensure compliance with building and safety code requirements.
